NGUYỄN QUỲNH TRANG

MARKETING | RESEARCH | AI TOOLS
Hanoi, Vietnam | +84 829 287 355 | k22anguyenquynhtrang@gmail.com

PROFILE

International Economics student at the Diplomatic Academy of Vietnam (GPA 3.66/4.0). I have finished my coursework and can work full-time. In my latest internship I wrote and tested AI sales chatbots, read thousands of real customer chats to learn what people ask and why they stop replying, and designed website pages for a travel company. I am good at research and numbers, check facts before I use them, and build small tracking tools with AI coding tools. I speak English (IELTS 7.0) and German (ÖSD A2, B1 course in progress), and I am looking for a remote role in marketing, research or AI.

EXPERIENCE

Meetup Travel | Digital Marketing Intern
August 2026 - October 2026 | Innovation team

- Wrote the persona, tone and conversation flow for 8 sales chatbots on Messenger, Instagram and WhatsApp, and revised them 16 times in 3 weeks based on daily chat reviews.
- Read 3,209 customer messages from 282 chats and pulled out 409 real questions. Sorted them into 40 topics and wrote 25 FAQ answers, each checked against company sources.
- Found that users left much more often after long bot messages: 52% after a message of about 800 characters, 16% after one of about 170.
- Added 2 contact questions to 8 live chatbots and tracked the replies every day. Removed one question on WhatsApp after 5 days because users found it annoying.
- Looked into why new chats fell from about 130 to 80 a day. The likely cause was a third-party tool locking Facebook conversations.
- Designed website prototypes in Claude Design: a 10-day tour page with a trip customization flow and 13 destination pages with 266 activity cards. Reworked the layout after sales team feedback (fewer clicks, prices shown earlier).
- Worked in the company CRM: set up accounts for new sales staff, linked their WhatsApp to message new leads automatically (Chatwoot, n8n), and built a search page for 8,700 CRM photos.
- Built a TikTok tool with Claude Code that checks new posts every day for copies of 357 company videos. Filed 5 takedown reports; TikTok removed 3 of the copies within 1-9 days.

Embassy of Vietnam in Brunei Darussalam | Intern
August 2025 - December 2025

- Researched markets, trade and international cooperation using Vietnamese and English sources. Checked facts across sources and wrote short reports, revised after supervisor feedback.

PROJECT

Tre Xanh Hòa Bình | Co-developer | Runner-up, Biz4Good 2025

- Researched what B2B buyers look for when choosing building materials and used it to shape the value proposition and marketing message for a bamboo scrimber product.
- Co-wrote the business model, financial plan and final pitch.

EDUCATION & AWARDS

Diplomatic Academy of Vietnam | International Economics
Coursework completed | Expected graduation: 2027 | GPA: 3.66/4.0
Top 15 Faculty Research, 2026 | Runner-up, Biz4Good 2025

SKILLS & LANGUAGES

Marketing: market research, customer segmentation, value proposition, chatbot conversation design.
Research: customer chat analysis, desk research, fact-checking, short reports.
Tools: Claude Code, Claude Design, ChatGPT, Python (with AI help), Git, Apify, CRM, Chatwoot, n8n, Canva, Microsoft Office.
Languages: Vietnamese (native); English (IELTS 7.0); German (ÖSD A2, B1 course in progress).
